Work Experience

Full Stack Software Engineer (II) | JPMorgan Chase & Co. | 08/2023 – Present

- Led design on a custom Agentic AI solution to increase funnel rate
 - Designed and implemented a dynamic multi-agent framework, built on top of Google ADK
 - Implemented RAG, real-time evaluations, and integration with business services
- Led development on an automation testing library to accelerate CI / CD adoption
 - Reduced the time required to create new UI automation tests by more than 50%
- Designed resilient, high performance systems leveraging technologies such as AWS, Kafka, and Java / Spring
- Implemented highly accessible and compatible UI applications utilizing technologies such as React, Node, and Typescript
- Oversaw the delivery of defect-free applications into production
- Expertise in leading agile ceremonies, coordinating cross-team efforts, and enabling both junior and senior developers
- Made extensive use of AI solutions to accelerate development, including the frequent development of Copilot-friendly documentation and Claude Skills

Software Engineering Intern | JPMorgan Chase & Co. | 06/2022 – 08/2022

- Implemented a full-stack application to improve customer experience

Undergraduate Teaching Assistant | Texas A&M University | 09/2021 – 05/2023

- Conducted weekly lab sessions on topics including object-oriented programming, algorithms, and data structures
- Developed tools to automatically score student work

Education

BS Computer Engineering | Texas A&M University | 08/2019 – 05/2023

- Graduated Summa Cum Laude (4.0 GPA) with a degree in Computer Engineering (CECN) and a minor in Mathematics
- Focus in low-level programming, accessibility, and cryptography
- Member of Tau Beta Pi

Skills

AI, Java / Spring, Kafka, Cassandra, AWS, React JS, Node, Typescript, C / C++, Python, Cucumber, Jenkins, Jira
